

MARTHA MESLINA FLORENCIA

Bekasi, West Java, Indonesia • mmeslinafs@gmail.com • 0813-8080-4108 • [linkedin.com/in/marttha-meslina](https://www.linkedin.com/in/marttha-meslina)

Informatics Engineering student at Universitas Padjadjaran with a focus on web application development and artificial intelligence. Experienced in developing educational chatbots, computer vision systems, and React-based user interfaces. Passionate about building interactive technologies to enhance user experience.

EDUCATION

PADJADJARAN UNIVERSITY
Computer Science

Jatinangor, West Java
August 2023-Present
(GPA : 3.82 / 4.00)

EXPERIENCE

LAB ASSISTANT UNPAD

Jatinangor, West Java

Data Structures, Programming Algorithm, Database System, Analysis of Algorithm **February 2025 - Present**

- Mentored 30+ students per semester in mastering core CS concepts, including Data Structures, Algorithms, and Database Systems.
- Facilitated hands-on labs for Programming Algorithms, guiding students through complex C++ implementations such as pointers, file I/O, and structured program design.
- Improved student technical proficiency by conducting code reviews and debugging sessions for various data structure operations and SQL query optimizations (Joins, Aggregation).
- Evaluated algorithm efficiency by teaching Big-O notation, time/space complexity analysis, and performance comparison of sorting/searching methods.

PUSAT INOVASI PENGAJARAN DAN PEMBELAJARAN UNPAD

Jatinangor, West Java

Front End Developer - Internship

August 2025 - December 2025

- Engineered an interactive AI powered learning chatbot interface using React and Three.js, enabling real-time 3D avatar rendering via WebGL
- Implemented dynamic avatar state transitions (idle, listening, thinking, speaking) synchronized with AI generated responses
- Integrated ElevenLabs Text-to-Speech API with browser fallback to deliver seamless multimodal interaction (text and voice)

PROJECTS

Seluna

- Designed a Figma-based women's safety mobile app with live tracking, SOS, and chatbot features, applying user-centered design to ensure intuitive emergency support.

Addicx

- Designed a user-centered mobile app concept to help young adults reduce smoking and online gambling habits using gamification, behavioral tracking, and educational content, with engagement features and behavior-change strategies informed by UX research.

Urunin

- Developed a Next.js financial app that automates group expenses using OCR API integration to scan receipts. Engineered the backend logic with Supabase for real-time debt tracking and implemented a responsive Tailwind CSS UI, reducing manual data entry for users by automating itemized bill splitting.

Grammate

- Developed an AI-powered English tutor using NLP and DashScope (Qwen) LLM for real-time grammar correction and conversational practice. I built a predictive analytics dashboard using Linear Regression to forecast proficiency trends and visualize growth via Matplotlib, while implementing semantic context-checking logic to ensure conversational relevance and automated feedback loops

SKILLS

- **Programming Languages:** C++, Python, Java, JavaScript, HTML, CSS.
- **Frameworks & Tools:** React.js, Next.js, Flask, Git, VS Code, Figma.
- **Soft Skills:** Communication, Team Collaboration, Time Management.
